

**Dear Students,**

Welcome to Week 11 of Business Informatics IIIA:

**Assignment:**

You need to submit **Assignment 04** on 5 April if you are registered for semester 1 or on 20 September if you are registered for semester 2.

**Revision:**

This week you need to conduct revision on chapter 1 – 6, 4-10 Apr/19-25 Sep 2016.

Make sure that your summaries are correct and that you included all the concepts and long questions of the exam guidelines in your summaries.

Remember that when you study you need to “test” yourself by writing down an explanation of the concepts and the answers for the long questions on a blank piece of paper (without checking the textbook or your summaries). You can then see how much you can recall and which concepts you still need to study and understand.

**Exam date:**

Please refer to your exam calendar for your exam date and time.

Kind regards,

Ruthea Vorster  
Lecturer  
School of Computing  
College of Science, Engineering and Technology  
University of South Africa
